VALENTIYES WATER WHEEL

[To the Lditar of the Whig and Counter]

Mile April 29 1845

I have lately purchased of Mesery Hinckles & Leery one of Velentine's Patent Reacting Water Wheels which has been jut in operation by Mr Spavid M Clench an experienced Mili wright of this fown for propelling machinery in the Woollen Factors. The wheels of the excels our expectation that I consider it is not estomated to the proprise 1.8 to recommend the Whiel to refrom building factories or oil er Milis as being superior to any other Wheel with which I saw acquainted. The Wheels is he feet in diameter and the head of water is I leet. This drives one set of Woollen Majchiners with fulling full and picker. The power is given hear three times as much power as the II feet. In Milian with the back water, and goes in the superior of the Wheel is not obstructed by back water, and goes in the superior water that the Water Wheels are not obstructed by back water, and goes interested wathout the bid of a regulator—a one interested in Water Wheels are not it is the I feet. It is the I water Wheels are not it to I at the I actory and examine for therefore.

on sinterested in Water Wheels are main dial at the Factory and examine for them elves J. W. CUSHING.

The undersigned confidentially recommend this cell to the owners and operators of Manufages, Mills, and Machinery as effecting any eline use for power duribility, conj. dity and or may.
